

To whom it may concern.

This letter is to recommend Adrian Ababei as a PHP / Drupal developer.

We've now worked with him on two projects and we have been very happy with his quality and work ethic. He is a rare developer in that he keeps the momentum going and takes initiative. We feel that he would certainly be an asset to any team.

We would work with him again and recommend him for further projects.

Sincerely,

Brian Hendel | President
